

15% POLYMERIC QUATERNARY AMINE NON-OXIDIZING COOLING WATER BIOCIDES

DESCRIPTION

15% POLYMERIC QUATERNARY AMINE is used in recirculating cooling water systems, air washers, and decorative fountains to control microbial growth. The product is effective over a wide pH range against the microorganisms typically found in these systems.

FEATURES AND BENEFITS

- Excellent broad spectrum microbicide
- Effective over the range of pH's found in typical cooling systems
- Non-foaming
- Effective against algae

PRODUCT FEED AND CONTROL

15% POLYMERIC QUATERNARY AMINE is normally shot fed according to the label instructions. The technical specialist servicing the facility will provide specific treatment control levels based on system conditions.

15% POLYMERIC QUATERNARY AMINE is normally fed neat directly from the shipping container. Tanks, pumps, piping and valves should be made of stainless steel, polyethylene, or PVC.

PHYSICAL PROPERTIES

Physical properties of 15% POLYMERIC QUATERNARY AMINE are shown on the Material Safety Data Sheet (MSDS), a copy of which is available upon request.

STORAGE AND HANDLING

Keep in a tightly closed container. Store indoors. Recommended storage temperature is 50° F - 105° F (10° C - 40° C). Do not reuse container. Dispose of empty container in compliance with federal, state/provincial and local laws and regulations. Refer to label for specific instructions.

ENVIRONMENTAL, HEALTH, AND SAFETY

For detailed information, consult the material safety data sheet (MSDS).

PACKAGING

15% POLYMERIC QUATERNARY AMINE is available in a wide variety of customized containers and delivery methods.
